Interests

Watching K Drama/CDrama, playing with my dogs. Watching anime or reading manga. Milk tea and coffee

Dependable Senior-level Web Developer ready to lead full stack software development efforts at any scale. Skilled at technical leadership, communication, presentations and had collaborative works with different development teams from remote or international. A results-oriented Full-Stack .NET Developer with over 10 years of experience working in a variety of environments. Communicates clearly with non-technical audiences and excels at training and mentoring newer developers. Solution-driven and an active team player that will support the team's success through hard work, attention to detail and excellent organizational skills.

My strengths were refined throughout my professional career and it has provided me with technical and innovative skills necessary to contribute to the team and the company.

Experience

Senior .NET Developer

2019 - Present

Eclaro Business Solutions, Inc. / Quezon City, Philippines

- Maintaining existing applications. Designed and delivered new functionalities, enhancements, and change requests.
- Initiated implementation of a Repository Manager for Libraries being used by multiple applications.
- Learned .Net Core on initiative and created a Web Application from scratch, the team's first .Net Core application.
- Shared and interpreted to the team the Technical terminologies and explained Design patterns
- Working closely with clients to establish specifications and system designs. Introduced using Test Cases, Release notes, and Test data for UAT
- Built new Reports and new Packages using Microsoft Reporting and Integration Services (SSRS, SSIS)
- Built dynamic IS packages using BIML for different database sources
- Collaborated with my team in implementing and initiating the automated deployments (Web, SSRS, SSIS) using Atlassian Bamboo (CI/CD) and presented to the other development teams
- Built automated testing scripts using an industry-leading automation tool - MABL

Consultant/Project Lead

2016 - 2019

Atos Syntel / Taguig City, Philippines

- Worked with both Onshore and Offshore teams on delivering project requirements and deliverables to Clients.
- Worked on an Agile Development and completed tasks ahead of schedule
- Created API from scratch with the team and collaborated with other development teams that consumed the service
- Lead a local team and delegated tasks. Meet with Offshore and Onshore to discuss pending tasks and which are in progress, with blockers, and for deployments
- Collaborated with the QA team for an easier understanding of the requirements of the changes to be tested
- Created functional specification documents for each release.

Software Developer

2016 - 2016

Chantons, Inc / Makati City, Philippines

- Developed change requests from business users and fixed reported bugs
- Maintained internal systems

Project Consultant/ Programmer

2015- 2015

International Organization for Migration, Inc / Makati City, Philippines

- Continued support and adding new features for the application converted from PHP to .NET

Project Consultant/ Programmer

2015- 2015

RCG IT / Makati City, Philippines

- Assigned as the primary developer for converting a PHP web application to a .NET web application.
- Designed the front end using the latest Bootstrap and normalized the combined two database servers of the prior version of the application
- Organized the project class libraries for efficient development of relating the data models to the User Interface

Software Engineer

2012- 2015

Trend Micro, Inc. / Pasig City, Philippines

- Developed and maintained the company's leave systems for different regions.
- Maintained a web-based submission portal for the research team
- Worked with the upgrade of a legacy ticketing system being used by the Technical Support group
- Maintained and supported additional requests for the upgraded application

Consultant/Project Lead

2012- 2012

Prime @ Technology Specialists, Inc. / Pasig City, Philippines

- Worked with web-based and window-based applications
- Developed new web pages that can generate reports of clients' data and automated receipts.
- Build scheduled batch jobs and SQL jobs for scheduled transactions

Associate Software Engineer

2011- 2012

Sykes Asia Inc. / Pasig City, Philippines

- Requirements gathering, strategic planning, database normalization, and overall system development of a knowledge-based project
- Developed application from scratch while following the coding standards and naming conventions of the company
- Supported and sustained an internal project
- Delivered change requests and deployed maintenance fixes
